Policy Statement on Water Conservation

Introduction

Water is an important natural resource and a basic human need. The college has taken an initiative to focus on water conservation and rainwater harvesting, reuse of water and recharging of structures and drinking water sanitation. The rainwater harvesting system is available in college campus. The rain water of the whole campus is systematically collected in check dam in college campus. From rooftop, overflow water from water tanks and waste water from RO are connected to a Farm Tank. Rainwater harvesting is done by diverting water.

Objectives

- To collect rain water in natural way from rooftops of all buildings, open spaces and college ground without disturbing the ecosystem.
- To reduce water consumption using proper disposal of waste water
- To use drip irrigation to avoid excess use of water in maintain green campus
- To monitor water utilization properly reserved in storage tanks of each building
- To use human resource control over water supply and water used for gardening.

Water Conservation Policy

- Rain water harvesting from rooftops of all buildings, open spaces and college ground to conserve in the recharge well.
- Water is also collected from water tank overflow and RO waste water.
- Water storage tanks are constructed.
- There is a dedicated manpower water supply for fresh water and garden use.
